

Plot 13b, St George's Allotments, The Moor, Melbourn

The picture below shows what the plot holder wishes to keep, everything within the wire mesh and frame – however the frame is to be removed.

The following pictures show what the plot holder would like to be removed.

Picture above – bricks/cement to be removed

Below shows a bucket in the ground- a hole will need piercing for the water to drain out, then the bucket can be lifted out.

Picture to the right- both containers (white and black) are filled with water, both need removing along with the glass panels on top.

Difficult to see in the picture, but along the fence there are panels of glass which need removing.

Picture above, all of this pile needs clearing

Picture below- everything within the circled area to be remove including the wooden frame in the background.

Picture above- all rubble on plot (as shown) to be remove

Picture below – remove bucket and glass

picture below- remove grey container and fruit cage

Picture below – remove water container
