Dear Claire

As we discussed, were quoting to tidy the wild flower area on the right of the path in Stockbridge Meadows, between the path & the gardens, all the way down to the river. Most of it would have to be strimmed, we may cut the river end using a mower if we can

Care would be taken to make the public aware that we were there

Total £180.00 x Vat

Roll the amenity areas **£140.00 x Vat**

Drainage improvements

As discussed on the phone, the recreation ground is in such a bad way. Mainly due to the fact it is so badly compacted with the amount of use it has. There are so many more people on there now with all the new houses in the village, along with the sports all played on it. The rec is in the worst state I have ever known it & we are struggling to be able to do any winter maintenance, & we haven't even had much rain.

Drainage improvements

We have what is called a grassland mole plough, basically this travels underground creating a channel. This not only creates a channel for the water to flow through, it also relieves the ground to improve the ground.

The mole runs at roughly 3-4 meters apart, creating a groove. This is obviously visible but soon recovers & will be able to be used immediately afterwards. The implement would be dropped in on the riverbank & head towards the carpark.

Should you have any questions, please feel free to contact me

Total for the works £600.00 x Vat
