MELBOURN ALLOTMENT SITES : THE MOOR AND GRAYS ALLOTMENTS

SPECIFICATION FOR SHEDS ON THE SITES

All sheds should be purchased from commercial suppliers, not constructed by plot holders.

The maximum size should be 2*3 metre foot print and 2,2 metre high. This would include smaller storage units for tools.

Sheds should only be made from wood, protected with preservative.

Roofs can be flat or gabled, using roof felt or equivalent. Pent is recommended as this is the most effective design for water capture from guttering into a water butt.

Windows will be allowed as long as they are not glass.

Sheds should be placed on appropriate footings to ensure that they are secure and will not be disturbed by normal wind conditions. This should not be concrete or bricks. Sand and slabs are suggested.

Sheds should be professionally installed.

Sheds must be properly maintained.

Only one shed will be allowed per plot (including half plots).

Installation should not disturb adjacent plots, without permission of the adjacent owner.

It is the responsibility of the departing plot holder to deal with transfer of their sheds to new plot owners or removal if requested by the new owner.

Sheds must be appropriately insured.

No fuel or flammable material should be kept in the shed. No toxic chemicals should be kept in the shed.

The shed should be kept secured with a padlock.

Sheds should be positioned so as not to unreasonably shade a neighbouring plot.

Plot holders should ensure that bonfires are not positioned near to a shed on their, or an adjacent, plot.

There will be a provision for a "dangerous shed notice" which will be part of the regular plot inspection system. This could be because the shed is leaning or has damaged, loose or rotten components. A plot holder served with such a notice will have to make the shed safe or remove it.

Glass greenhouses are not allowed. Polycarbonate greenhouses are permitted provided they are properly constructed and secured in place.
