Dear Sirs,

I write in respect of work carried out by your contractors on 31 May 2024 to the area of land at the junction of Beechwood Avenue and Ash Grove.

This area of land was cut / strimmed / mowed. The following pictures show the result of the 'work'.

Hardly satisfactory I'm sure you would agree.

So my question is 'what quality checks are in place for services provided to the council?'

This morning I have spent time tidying the area and the result can be seen below:

My invoice for this work is attached.

I would also like to raise the question of the tree stump on this area of land.

To recap. In 2022 I was in discussion with the council concerning the damage done to my property by the maple tree that used to stand on this land. The result was that I had to pay a considerable sum for repairs to my property for which the council admitted no liability. As a result of further discussion I then agreed with the council to pay 50% of the cost of removing the tree, the stump and the replanting of a more appropriate sapling. The latter has yet to happen.

Any comment please?

Your faithfully
