Subject: Meadow/Orchard behind pavillion.

Hi

The meadow around the orchard and tree planting area behind the pavilion on the Moor seems to be benefitting from not being mown as frequently as in the past..

There are a number of wild flowers beginning to establish themselves.

Is there a management plan for the area that includes a grass cutting scheme that takes into account the best times to mow the meadow?

If not - would the PC be open to creating one if the "legwork" was carried out by interested third parties?

Many thanks,
