**Subject:** Over hanging trees

Hello to you all,

I emailed last year with regards to the trees at the back of Worcester Way and how they were over hanging the garden. Lot's of arrangements happened and the trees were trimmed. I emailed back to thank you for the work that was carried out.

Unfortunately now, I am in the same predicament, although it is worse. Too which I will explain.

[REDACTED] Unfortunately the trees at the back of my garden are sycamores and shed their propeller seed pods, that I can only pick up by hand, which is not ideal. I will not exaggerate but I can pick up hundreds in a spate of a week. Also the trees are blocking out natural light within the rear of my house and also shedding sticky residue over everything in my garden including clean washing, newly installed windows, garden furniture and my shed roof. I will not cut the said over hanging branches down until yourselves have inspected them from within my garden.

I hope we can come to some resolution and am happy for you too come and inspect my garden from my point of view which I think would be a good idea as long as it is an afternoon appointment so you can assess how much natural light I am losing and putting that cost onto my energy bill.

Thank you for your understanding and hope you appreciate that I am struggling with the trees and would appreciate your understanding with my dilemmas, so that we can come to some like minded solutions.

Kind regards

[REDACTED]
