**Date: September 25** 

#### 1. Introduction

This report has been generated using the Rialtas Finance System and provides a comprehensive overview of the income and expenditure related to the maintenance of Melbourn Village for the period 01 April 2025 to 30<sup>th</sup> September 2025. The aim is to support informed decision-making by the Maintenance Committee.

#### 2. Report Overview

All financial data is categorised into cost centres that correspond to different areas of village and the maintenance required. Where applicable expenditures have been split into two categories:

- Planned (budgeted)
- **Unplanned** (non-budgeted/emergency or unforeseen)

This classification helps to better track how the Council's financial resources are being used and to identify areas requiring attention.

#### 3. Key Notes.

- Maintenance Contract: The Parish Council has entered into a village maintenance contract, which has helped in streamlining and effectively managing recurring costs.
   Associated costs have been appropriately distributed among relevant cost centres.
- **Reporting detail:** By showing the income and subsequent expenditure will allow the committee to see how much each area costs and assess the income and or the community benefit that is derived from our assets.
- Stockbridge Meadows: This area was added to the village maintenance contract after
  the annual budget was approved. Consequently, its associated costs are not
  reflected in the original budget and will require close monitoring to avoid
  overspending.
- Pavillion Boiler: This was an uplanned repair in July.
- **Reserves Management**: When reviewing expenses, it is important to assess whether they:
  - Fall within the planned budget,
  - Can be covered by any existing reserves held.
  - Or are unplanned.

### 4. Ongoing Improvements

As the Council continues to transition to more detailed financial reporting, the **Parish Clerk and the RFO** will work in closely to:

- Provide additional insights where needed,
- Flag any anticipated high-cost maintenance works,
- Ensure the Committee is fully informed to make sound financial decisions.

#### 5. Conclusion

The financial reporting approach using Rialtas enhances transparency and accountability. Monitoring cost centres closely, especially for post-budget additions like Stockbridge Meadows, will be critical in the coming months.

For any further clarifications or questions regarding this report, please feel free to contact the RFO directly.

# Monthly water situation report: East Anglia

# 1 Summary - August 2025

Rainfall for August 2025 was below average across all catchments in East Anglia, with rainfall totals ranging from 29% to 46% of the long term average for the month. The soil moisture deficit for East Anglia increased to 124mm at the end of August 2025, with South Essex and Central Area Fenland recording the highest soil moisture deficit values. River flows in the Ouse, Ivel and Rhee catchments maintained normal flow rates, with all other catchments classified as below normal or lower for the time of year. Groundwater levels at all sites continued to fall, with sites ranging from above normal to exceptionally low. Public water supply reservoirs in East Anglia ended August 2025 with levels ranging from 61% to 77% of full storage capacity.

# 1.1 Rainfall

August 2025 rainfall totals across East Anglia ranged from 29% to 46% of the long term average [LTA] for the month. The month began and ended with rainfall, with little to no rainfall received between 5 to 26 August. Average rainfall across East Anglia for August 2025 was 21mm, which is 35% of the historic LTA. The highest rainfall totals were recorded towards the west of the area, with the lowest rainfall recorded in East Suffolk. All catchments recorded notably low rainfall for August 2025, except the Little Ouse and Lark catchment, which recorded below normal rainfall. Cumulative rainfall totals over the past 6 months have been exceptionally low in all catchments, except for East Suffolk which has been notably low.

# 1.2 Soil moisture deficit and recharge

The soil moisture deficit [SMD] for East Anglia at the end of August 2025 was 124mm. South Essex and Central Area Fenland recorded the highest SMD values, ranging between 131mm to 160mm. Across East Anglia SMD was recorded as exceptionally high, with SMD ranging from 6mm to 50mm above the LTA for the time of year. Central Area Fenland and the Upper Bedford Ouse recorded the largest difference from the LTA.

### 1.3 River flows

River flows across East Anglia during August 2025 continued to recede, with most catchments responding to rainfall at the end of the month. River flows in August 2025 ranged from 3% to 90% of the LTA, with flows ranging from normal to exceptionally low for the time of year. The highest flows were recorded in the south west of the area, with the lowest flows concentrated towards the centre of the area. The Ely Ouse at Denver continued to record exceptionally low flows in August 2025, with the month mean flow recorded as 3% of the LTA.

### 1.4 Groundwater levels

Groundwater levels continued to fall in line with the expected seasonal pattern. Groundwater levels at the end of August 2025 ranged from above normal, at Therfield Rectory, North Hertfordshire Chalk to exceptionally low at The Spinney, Wensum Chalk. The majority of sites were categorised as normal or below normal for the time of year.

#### 1.5 Reservoir stocks

Public water supply reservoirs within East Anglia finished August 2025 with levels ranging from 61% to 77% of full storage capacity. Alton, Ardleigh, Grafham and Hanningfield all ended August with levels below their respective normal operating curve. Abberton reservoir level was just above the respective normal operating curve for August.

#### 1.6 Forward look

# 1.6.1 Probabilistic ensemble projections for river flows at key sites

River flow projections for the Bedford Ouse, Ivel, Kym and Ouse catchments all show a high probability of normal or higher flows for September 2025. Flow projections for the Ely Ouse show a high probability of below normal or lower flows for September 2025. River flow projections for December 2025 are varied with a high probability of normal to below normal flows.

# 1.6.2 Probabilistic ensemble projections for groundwater levels in key aquifers

Groundwater level projections for September 2025 are expected to be within the normal to below normal range, with the exception of Therfield Rectory which is expected to be above normal. Groundwater level projections for March 2026, show a high probability of below normal to notably low levels, again with the exception of Therfield Rectory which shows a high probability of normal or above groundwater levels.

# 8 Glossary

## 8.1 Terminology

## **Aquifer**

A geological formation able to store and transmit water.

## Areal average rainfall

The estimated average depth of rainfall over a defined area. Expressed in depth of water (mm).

#### **Artesian**

The condition where the groundwater level is above ground surface but is prevented from rising to this level by an overlying continuous low permeability layer, such as clay.

#### Artesian borehole

Borehole where the level of groundwater is above the top of the borehole and groundwater flows out of the borehole when unsealed.

#### **Cumecs**

Cubic metres per second (m<sup>3s-1</sup>).

#### **Effective rainfall**

The rainfall available to percolate into the soil or produce river flow. Expressed in depth of water (mm).

# Monthly water situation report: East Anglia

# 1 Summary - September 2025

Rainfall for September 2025 was standard for the time of year, with rainfall totals within the normal range across all areas. The overall soil moisture deficit changed little over the course of the month, the regional average increasing from 124mm at the end of August to 125mm by the end of September. Some of the more reactive rivers showed a temporary response to observed rainfall, though have since fallen with little change to base flow. Groundwater levels continue to fall, with all sites at normal or lower levels. Public water supply reservoir stocks ended the month ranging from 52% to 69% capacity.

### 1.1 Rainfall

Rainfall during September 2025 ranged from 81% to 122% of the long term average [LTA] for the month. East Suffolk received noticeably more than other catchments, receiving the higher 122% with the only other catchment receiving more than 100% of the LTA being the Upper Bedford Ouse at 107%. The cumulative 3-month total rainfall for all catchments has been below normal, with the exception of East Suffolk and Broadland Rivers which have instead received normal totals. The cumulative 6-month total shows the extent of the dry spring and summer seen this year, with exceptionally low totals across south-western catchments, and notably low totals across the northeast, again with the exception of East Suffolk which is below normal.

## 1.2 Soil moisture deficit and recharge

The regional soil moisture deficit [SMD] at the end of September was 26-50mm higher than normal for the time of for all catchments with the exception of East Suffolk, North Essex and South Essex which were 6-25mm above the LTA. Fenland was the only catchment to end the month with an SMD greater than 131mm.

## 1.3 River flows

River flows across East Anglia during September 2025 continued to recede, displaying only a temporary response to the observed rainfall throughout the month. Monthly average flows ranged from 28% to 107% of the LTA, the Ivel being the only river with above normal flows and both the Ely Ouse and Wissey displaying exceptionally low flows. Flow at Denver on the

Ely Ouse have dramatically increased compared to August, the monthly average increasing from 3% to 35% of the LTA in September.

## 1.4 Groundwater levels

Groundwater levels continue to fall across all catchments which is expected for the time of year. Levels range from above normal at Therfield to exceptionally low in Costessey. While levels have dropped at all sites, some have fallen at a reduced rate, both Washpit Farm and Breckland ending the month at a higher banding than they did for August despite lower levels.

## 1.5 Reservoir stocks

All reservoirs with the exception of Abberton have fallen below their respective normal operating curves for the time of year as stocks continue to fall. Stocks ended the month ranging from 52% to 69% capacity.

## 1.6 Forward look

## 1.6.1 Probabilistic ensemble projections for river flows at key sites

Surface water flows are projected to continue declining, with a higher likelihood of below normal or dryer flows at all sites with the exception of the Ivel by December 2025. The March 2026 projection forecasts slightly higher odds of drier flows, with increased likelihood of notably low and exceptionally low flows.

## 1.6.2 Probabilistic ensemble projections for groundwater levels in key aquifers

Groundwater levels are projected to continue dropping, and have a high chance of being either below normal or lower levels by March 2026. The September 2026 projection predicts much the same, though with a higher likelihood of lower levels. Redfield is an exception to both projections, with a high degree in confidence of normal or higher levels.

**Subject:** Medcalfe Way - Fencing

Follow Up Flag: Follow up Flag Status: Flagged

Dear Sir / Madam

Good morning I am emailing you regarding some maintenance. Myself and my wife have just bought a house on medcalfe way backing on to the cemetery.

After doing some garden clearing the fence on the boundary to the cemetery is in disrepair by what is the hedge line in the cemetery. I am aware that maintenance of the hedge from my side would have been impossible for your maintenance team in the past. I am writing in the hope we can come to some sort of arrangement with the help of cost towards replacing damaged fence. I am willing and able to carry out the works myself to keep cost at a minimum but a contribution to materials would be hugely appreciated with the recent out lay of buying the property money isn't readily available for this on our part.

To future proof this from happening again I would use concrete post and easily removable panels so I could personally keep my side of the bush trimmed at the cost of myself. I look forward to hearing from you and hope that we can get this issue resolved hassle free.

Kind regards

#### MA076 2526c) New Road memorial request

Email received 22 September 2025

I hereby request permission to place a memorial in a 'less formal area' of the cemetery for my recently deceased relative, D Harris . My family would dearly love to honour D 's memory with a bench, simple plaque or memorial of the Parish's suggestion, to be placed somewhere of the Parish's suggestion, so that we can visit and remember D for years to come.

Discription Discri

To answer your question, no, D is not interred at the cemetery. He was recently cremated at Cam Valley. We have scattered some of his ashes under an apple tree in our garden but, as a separate line of enquiry from the memorial request, I wonder whether we might have permission from the Parish to scatter some of the ashes at the cemetery please?

I look forward to hearing from you.

#### Dear Abbie

As discussed we are quoting to clear the access roadway to the rear of New Rd Cemetery, this is very badly overgrown & needs clearing right back to the hedges. If you just trim it back there is such an infestation of bramble it will just grow back again straight away.

We would remove any bigger material from site, chipping/mulching the majority of the vegetation.

Signs & tape etc would be used to protect the general public whilst we were working on site.

We would clear from the top of Water Lane to the boundary hedge of the cemetery as we talked about.

Issue Ongoing concern about the state of the All Saints wall facing the High Street.

#### Correspondence from All Saints – 1 August 2025

The southern section of the churchyard wall at Melbourn is currently in a state of disrepair.

Following the closure of the churchyard in 1901, responsibility for maintaining the churchyard, including its trees and boundary walls, was assumed by the Parish Council. The Parochial Church Council (PCC) has invited the Diocesan Advisory Committee (DAC) to visit the site and provide guidance on appropriate repair methods.

The section of wall under consideration measures approximately 11 metres in length and is situated between an early twentieth-century construction to the west and an area of yellow brickwork at the eastern end. It is our view that both adjoining sections are in satisfactory condition and do not require intervention. The portion identified for repair appears to have been constructed and patched at different times, utilising a variety of materials, including numerous types and colours of brick. Additionally, there are small flint patches present; however, these seem to be 'modern' repairs executed with cementitious mortar of substandard quality.

Following discussions with the Diocesan Advisory Committee, The PCC propose that the damaged section be reconstructed using yellow brick to match the east end. To enhance the transition to the modern bricks at the west end, the addition of a buttress as a visual marker is recommended. Most of the existing coping stones can be retained and reused.

As Chair of the PCC, I am writing to formally request that the Parish Council commission a structural engineer to assess the condition of the wall and prepare a comprehensive scheme for its repair.

The churchyard remains the property of the church; therefore, any repairs or alterations require Faculty approval. Applications for such consent should be submitted through me as the Incumbent of the Parish of Melbourn.

Office responded raising concerns over previous talks with the Conservation Officer and asking if any funding would be available through Parochial Church Council (PCC) or Diocesan Advisory Committee (DAC).

Yes, we do have some access to grants that could be considered to apply for the wall to be fixed, but we would need the Parish Council's permission to start approaching those options. If you're happy for me to look at this – like we did when we had the damage to the wall at the rear of the church back in March this year – then please let me know as I can get some quotes done for the repair.

We could engage a structural engineer to report on the wall, but we would need to seek the cost of that back through the PC.

We hope that we can work together to get this sorted as quickly as possible. Sadly I am in the same situation at Meldreth!

#### Actions so far

- Office contacted the Shared Prosperity Fund to enquire if this project would be eligible to apply for the 'Improving The High Street Grant' from South Cambridgeshire District Council – confirmation received that the project would be eligible <u>Improving the High Street grant (open)</u>
   South Cambs District Council
- Previous advice from the Conservation Officer:

The wall is considered curtilage listed to the church which is grade II\* listed. Rebuilding sections of the wall would therefore require planning permission, as it would be more work than could be considered a repair. Listed building approval would be dealt with by the DAC.

The section of wall in question shows evidence of centuries of repair with different brick types and flint. The variety of materials generally add to the character of the area, although some repairs are unsympathetic both visually and technically. There is clear evidence of failure, particularly where flint has blown and the wall is bowing. There is no evidence of imminent structural failure however.

My preference would be to salvage as many existing bricks as possible, and include them in a section when the wall is rebuilt. My suggestion for the main brick type is the Cambridgeshire stocks seen to the right hand side, which are more in keeping with the village than the modern red bricks off to the left. Reclaimed bricks might be an option. Lime mortar with a flush joint should be used. Reinstating the stone copings to supplement the existing ones will be necessary.

The application will need drawings of the wall, including any new structure behind the brickwork – e.g. concrete foundations. The general approach to rebuilding should be set out in a method statement, including sketches or annotated photos if possible. The more information included, the less chance of conditions being added to the permission. We might, for example, request as sample panel is built first.

- Concern over graves behind the wall would need further investigation as to who would be responsible for costs associated with any exhumation and reburial.
- Multiple quotes will be required PCC or the Parish Council can lead on this. It looks as if all
  costs will be the responsibility of the Parish Council (either found via funding, asset
  management reserves or possibly insurance)
- Asked for confirmation of responsibility of Parish Council in the maintenance of the closed churchyard – Office have not yet found evidence of handover – have requested evidence from All Saints.

#### Consideration

- Council to consider next actions.
- Define lead for gathering guotes
- Consider funding options.

#### **Update October 2025**

Email from All Saints: 6 October 2025

Further to the recent correspondence from the Parish Council, we have been able to identify that the churchyard is closed and that the cost of maintaining the churchyard is passed to the local authority.

Attached are 2 PDF's which show two pages from The London Gazette.

You will see Melbourn's closure mentioned on page 1, but the closure itself is dealt with in more detail on the second page. The London Gazette reports that the closure was approved on the 4<sup>th</sup> of November 1901, to take effect on the 31<sup>st of</sup> May 1902. The Burial Act 1855 section 18 states (in relation to closed burial grounds):

#### s18 Burial board to keep in order closed burial grounds, &c.

In every case in which any Order in Council has been or shall hereafter be issued for the discontinuance of burials in any churchyard or burial ground, the burial board or churchwardens, as the case may be, shall maintain such churchyard or burial ground of any parish in decent order, and also do the necessary repair of the walls and other fences thereof; and the costs and expenses shall be repaid by the overseers.....

As you will see from the Lond Gazette the order was passed in Council at St James' Palace.

With the enactment of the Local Government Act 1972, the Burials Board ceased to exist as a separate administrative body. Under the provisions of Schedule 26 to the Act, its functions and responsibilities were transferred to the relevant Parish Council, which henceforth assumed oversight of burial grounds and related duties. This legislative change formed part of a broader reorganisation of local government in England and Wales, streamlining various functions under elected parish authorities to enhance local accountability and governance. From 1 April 1974, the Parish Council became the statutory authority for burial matters previously managed by the Burials Board, in accordance with the transitional arrangements set out in the Act.

I trust that this helps to confirm both our positions in relation to the upkeep of the churchyard and its boundary walls and fences.

September, one thousand pine hundred and one, to give notice of such representation, and to order that the same should be taken into consideration by a Committee of His Majesty's Most Honourable Privy Council on the thirty-first day of October, one thousand nine hundred and one, and copies thereof have been affixed as required by the said first recited Act:

Now, therefore, His Majesty, by and with the advice of His Privy Council, is pleased to order, and it is hereby ordered that the following directions be substituted for the directions contained in the said Order in Council of the third May, one thousand eight hundred and eighty-eight, so far as it relates to the new part (added in the year one thousand eight hundred and seventy-one) of the new or additional parish churchyard in

Ruthin-road, Wrexham, viz.:—
WREXHAM.—That burials be discontinued forthwith and entirely in the new part (added in the year one thousand eight hundred and seventy-one) of the new or additional parish churchyard in Ruthin-road, Wrexham, in the county of Denbigh, except as follows :-

An Exclusive Right of Burial will be created on the application for the first burial. An application for multiple burials, if required, must be made at this time.
- b. Whilst ownership of an Exclusive Right of Burial for a grave does not give any ownership whatsoever in respect of actual land it does give the owner of the Deed the right to:

- c. On the purchase of the Exclusive Right of Burial in a grave a Deed of Grant shall be issued to the purchaser whose name shall be registered (to be known as the Owner).
- d. Possession of a Deed does not necessarily give the person in possession ownership of Exclusive Right of Burial. Where the owner is deceased, subsequent ownership depends on whether or not the deceased left a valid Will. The law concerning this matter is very complex and it is strongly advised that a solicitor be consulted to establish the new ownership. Ownership of a Deed may also be transferred or assigned by use of a form (Declaration, Indemnity and Application in respect of the transfer or Assignment of an Exclusive Right of Burial obtainable from the Clerk to the Council).

- The Deed of Exclusive Right of Burial is an important document like any other Deed and should be kept in a safe place.
- f. The Exclusive Right of Burial shall extend for 75 years from the date of purchase. Rights may be extended for a further period of 75 years on payment of the fee when applicable.
- g. The transfer or assignment of an Exclusive Right of Burial in a grave must be notified to the Clerk to the Council who will enter the transfer in the Register of Grants maintained by the Council upon production of the Deed.
- h. Notice for the interment of cremated remains must be accompanied by the Certificate issued by the Crematorium where the cremation took place.
- i. This is to be recorded by The Clerk to Melbourn Parish Council / Burial Officer.
